

Liberate Your Life - BE FREE TO GROW

A 7 month custom designed Personal Transformation Adventure

For Skype, Phone or Face to Face sessions
Details of the Plan, Cost & Benefits below

The purpose of this program is to support you as you discover your dreams and desires, to help you experience contentment and most of all to Know (Heal) your Self. It will give you the opportunity to work closely with Ranjana and Eddie Appoo, dedicated Wholistic Health Professionals and Energy Therapists, for 7 months. This is a

custom designed program to heal the mind and liberate your Heart. The first step is to arrange a free consultation and discuss your needs and discover if Ranjana and Eddie can help you feel FREE TO GROW. **Email Ranjana or Eddie at emotionalhealthcentre@googlemail.com to book your free consultation.**

Ranjana writes, *"Having worked with clients for years on a variety of issues we discovered that using a combination of Energy Psychology techniques and Jin Shin Jyutsu over a period of 7 months to a year has profound benefits. On average most of those who contact us for individual consultations organise sessions on a short-term basis. This varies between two to six sessions (Face to Face sessions and/or phone/skype sessions), although if an issue is complex, more sessions may be required. This is very effective, & in 85% of all projects, relief is experienced and people move on. However, the clients who I have worked with over a longer period of time (on average 2 sessions a month for 7 months to a year) have benefited in a way that has transformed nearly every aspect of their lives!"*

*In my own life, having used these techniques for years I can say that I have not had a cough or cold in years. When challenges come my way they are adventures. Aches, pains and injuries heal swiftly now. Having had a history of depression, chronic fatigue and migraines, I never dreamt I could feel this relaxed, happy or confident; that I could be completely free from addictions, from alcohol and tobacco, and that I could love myself and enjoy BEING ALIVE. In the past I would easily succumb to depression. **Now it is easy for me to shift my vibration, face myself with honesty and acceptance, restore harmony in my body, mind and spirit, and focus on Truth and Love.** I also pay close attention to my physical needs, like diet, nutrition, supplementation, relaxation and exercise."*
